### **About Us**

MapData Sciences is on the cutting edge of digital mapping technology and we continue to add leading global and Australian organisations to our client list. We are looking for a smart, talented, Business Analyst to join our growing team.

MapData Sciences operates one of the largest online mapping portals in Australia and hosts over 200 spatially aware applications for a blue chip client list.

**Reporting to the Professional Services Manager**, you will be primarily responsible for;

- Acting as the intermediary between business customers and IT to ensure that business/user requirements are delivered in our online IT solutions.
  - Gather information from a range of sources including documents, interviews and participation in workshops with end users and system/project stakeholders.
  - Analyse and document requirements in a clear and appropriate format to meet the needs of system designers, developers and business customers.
  - Establish system specifications appropriate to problems or project objectives.
  - Build relationships with users, IT staff and management to identify and resolve issues associated with system implementation or business process changes.
  - Implement or participate in testing, change management and training plans to ensure the quality of projects and their smooth execution.
  - Analyse and resolve business and technical problems using available information and effective problem solving techniques.
- Ensuring IT systems meet business needs through the planning and execution of testing of online solutions
  - Deliver quality application change across various platforms through analysis, planning, creation and execution of User Acceptance Test designs, cases and procedures.
  - Liaise with developers to ensure that planned testing meets requirements.
  - Acquire and analyse all relevant documents for assigned projects to determine testing requirements.
  - Consult on testing matters to business and IT project managers.
  - Execute test cases for all assigned projects/enhancements.
  - Raise any defects found during test and escalating in accordance with set procedures.
  - Track progress of allocated test designs and test cases to ensure testing deadlines will be met.

**BUSINESS ANALYST / TESTER**
