For Immediate Release

Origin "Quick Swap" gas is just around the corner.

Origin Australia's number one green energy provider has updated its "**Quick Swap**" outlet locator to include the **latest "draggable" mapping** and navigation features provided by MapData Sciences Pty Ltd.

Origin wanted to enhance the overall customer experience of their Quick Swap locator and embraced the latest mapping technology provided by MapData Sciences. Origin first approached MapData Sciences in 2006 to develop the "Quick Swap LP Gas outlet locator". The location application was an important addition to the website, enabling customers to quickly locate their nearest retailer to exchange empty gas cylinders.

Gas cylinders are being used more often and therefore there is an increasing need to find a convenient "Quick Swap" location. As the popularity of alfresco cooking and dining increases in Australia, outdoor living designs and patios are becoming more of an outdoor room. Gas cylinders are being used not only for BBQ's but outdoor heating, caravans, boating and camping.
