For Immediate Release

Finding a Parking Station Just Got Easier For Everyone

MapData Sciences has added **Car Parking Stations** to its growing list of Point of Interest (POI) data. The parking stations join other datasets such as Fast Food Locations, Shopping Centers, Department Stores, Banks, Hospitals, ATM's and more.

These datasets help individuals and business to "discover" what is nearby, just around the corner, along a chosen route or within a market area. There are currently 11 datasets maintained by MapData Sciences and plans are for more to be released in coming months.

The datasets are available to all areas of MDS' business, for customers with in-house Geographic Information Systems (GIS), hosted online applications, those working with web services and for geo-demographic analysis with Tactician Online.

There are now 11 themes covering: -

- Fast food Outlets
- Shopping Centers
- Vehicle Rest Areas
- Fuel Stations
- Auto Service Centres
- Department Stores
- Hardware Stores
- Banks
- Hospitals
- ATM's and
- Car Park Stations

MapData Sciences has been developing hosted online digital mapping applications for over 10 years. MDS' mapping data is supplied to other online mapping providers and for in-house GIS development projects.
